3. **Drop-In and Counter Electric Systems**
4. **Generic Installation Kits**

Turnkey Beverage Systems

Planning, purchasing and installing a new post-mix beverage system doesn't get any easier! Turnkey beverage systems have been carefully planned and "right-sized" for standard applications, and include every component of a **COMPLETE** beverage system...

- Dispenser (some units include a Hoshizaki ice machine)
- Bag-in-box rack system
- Carbonator
- Water filtration system
- Bundled tubing
- Installation kit

Professional installation by factory trained service providers is available for a fee — everything from getting the unit and accessories out of the box to making sure they are operational (i.e. setting up BIB racks, dispensing unit, carbonator and running lines).

ABS and its network of factory trained service partners can customize a reactive service and/or preventative maintenance program to fit your specific needs. Please contact us about the following services...

- **On Demand/Reactive Service:** immediate dispatch of factory trained service partners that will repair your equipment in one trip within a reasonable time frame
- **Planned Preventative Maintenance:** custom designed program for all beverage equipment with frequency and criteria specific to your business and equipment demands — from simple evaluation of equipment to actual cleaning, calibration and staff training
- **Water Filtration "Auto" Ship Program:** filter cartridges should be replaced every 4-6 months based on regional water quality. A pre-determined schedule removes the scheduling burden from your managers

Installation/Maintenance Assumptions (continued next pg):

- All equipment and accessories must be shipped to the location or the Service Provider at least three (3) days prior to the scheduled installation
- The correct power source and plug must be within four (4) feet of the location where the equipment is to be installed

ABS offers equipment leasing options!
Please call customer service to learn about our low payment 24-60 month leasing plans!

Turnkey Beverage Systems

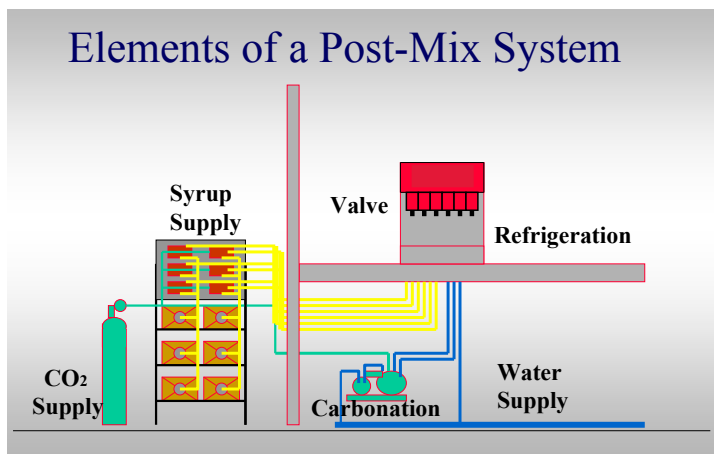

Installation/Maintenance Assumptions (continued):

- An available water source (when applicable) must be within six (6) feet of the location where the equipment is to be installed
- The installation site must be prepared prior to the Service Provider's arrival
- If the installation includes activating the system and setting the ratios on valves the appropriate product must be on site

In addition, we will meet these standards for all work performed:

- The installation must be completed by the agreed upon scheduled date, unless rescheduled at the operator's request in a reasonable time frame
- All work will be completed to the satisfaction of the local site manager
- Each installed unit will be thoroughly tested to meet all manufacturer standards
- On-site personnel will be briefed on the operation and care of the unit
- All Serial Numbers will be recorded and documented

Additional charges may occur if the above assumptions are not met, if the Service Provider is not allowed on the site, or if the equipment is damaged due to shipment, abuse, neglect or misuse.

Installation Kit

Kit includes installation components for the carbonator, regulator and beverage dispenser cold plate inlet plumbing: washers, nut and stem assemblies, barbed crosses, barbed tees, and cable ties. Kit also includes single line beverage tubing for the carbonator, regulator, syrup pumps and water hook up.

Turnkey System Components

Lancer Dispensers

Precision engineering, construction and testing ensure each dispenser meets Lancer's high quality criteria before leaving the factory, and is backed by a one year warranty.

Dispenser styles to choose from...

- Counter top mechanically cooled dispenser
- Juice counter top mechanically cooled dispenser
- Ice cooled drop-in dispenser
- Ice/Beverage dispenser
- Flavor Select

Valve styles to choose from...

- Lancer push button or lever valves
- Flomatic push button or lever valves

Hoshizaki Ice Machines

Ice/Beverage packages include a self-contained ice cube or cubelet ice machine appropriately sized for the beverage dispenser. The adapter plate to mount the ice machine on top of the dispenser is also included.

Water Filtration System

83% of every soft drink is water. Filtered water not only tastes better, it has better carbonation "pop" and the great taste customers appreciate.

Bag-In-Box Syrup Racks

Racks have a durable powder-coated black finish that resists chipping and rust. Rack assembly sizes depend upon the number of flavors dispensed. Syrup pumps, high and low pressure regulators, tubing and connectors are included.

Carbonator

Lancer's Turbo is known for its superior quality and reliability, and is ideal for fast flow valves. It has solid state electronics, a built-in advanced diagnostics system, and ASSE approved vented check valve.

Bundled Barrier Tubing

Barrier tubing eliminates the potential for external contamination, maintains flavor integrity, aids in fast flavor changeovers, and is impervious to gas permeation. All tubing is constructed with food grade materials.

Equipment Leasing

www.jhequipmentleasingco.com

JH Leasing can lease virtually any product from any manufacturer!

JH Equipment Leasing Company specializes in micro-leasing for small businesses and equipment leasing for general businesses. They offer any and all equipment used in restaurants and c-stores, and custom leasing on merchandising equipment. Their lease products are appropriate for businesses at any size or stage of development, and can provide a variety of benefits.

Even if you have never leased before, JH Equipment Leasing Company will walk you through the process with ease, assisting you with identifying the most advantageous leasing option for your unique needs, whether that means fulfilling your own small business equipment needs or providing customer leasing for your client base. They offer free equipment leasing quotes for merchandising equipment and other small business equipment.

There are two basic types of leases, each of which can be customized based on your unique leasing needs...

Capital Leases

The lessee acquires all of the economic benefits, as well as the risks, of the leased property.

Operating Leases Or True Leases

The lessor is treated as the owner of the leased equipment for both tax and non-tax purposes, the lessee's payments do not establish any equity. Leases are usually written for a considerably shorter term.

Key Benefits of Leasing:

- Improve cash flow and liquidity
- Easier credit terms on leasing vs. a financed purchase
- Align small business equipment costs with the benefit derived from that investment
- Enjoy predictability of payment streams – no surprises
- Facilitate budgeting process with fixed payments
- Equipment ownership at end of lease
- Operating or True Leases may provide tax advantages
- Helps your business prosper
- Preserves cash
- Balance sheet considerations
- Low payments
- Flexible funding schedule

Give us a call and let us know how we can help you.

AutoQuotes

www.aqnet.com

Manufacturer updates and the latest price list changes are available online at AutoQuotes.

AutoQuotes is a full-featured electronic catalog for foodservice equipment and supplies, complete with brilliant, full-color images and detailed spec sheets.

What can AutoQuotes do for you?

- Automate the quoting and purchasing process
- Eliminate the need for printed price lists and catalogs
- Drastically reduce errors
- Never lose money with outdated pricing again

AutoQuotes is a true web based program and it does require an internet connection to use. It can be used with other browsers but works best when paired with Microsoft's Internet Explorer.

The benefits of a web based program are:

- Nothing to install on your local hard drive
- Does not require an IT person to manage or do backups
- Instant access from anywhere you have an internet connection
- You're always connected to the latest version

Lancer products can be found in AutoQuotes.

TURNKEY BEVERAGE SYSTEMS

IBD 4500, 6 valve, 22" with Cuber Ice Machine	
Part Number	Description
IBD4500-22-6LEV-CUBE	Ice bev dispenser, 22", 6 LEV self serve lever valves, generic ID
	Hoshizaki adapter plate
	Self-contained 435 lb. CUBER ice machine, 22" x 27-3/8" x 30-5/16", 115V/60/1
	BIB syrup rack, 2W x 3H, 6 pump, LP/HP regulator
	8 line bundle tubing, 100'
	Lancer carbonator
	3M/Cuno water filter kit for beverage & ice
	6 valve installation kit

IBD 4500, 8 valve, 25" with Cuber Ice Machine	
Part Number	Description
IBD4500-25-8LEV-CUBE	Ice bev dispenser, 25", 8 LEV self serve lever valves, generic ID
	Hoshizaki adapter plate
	Self-contained 435 lb. CUBER ice machine, 22" x 27-3/8" x 30-5/16", 115V/60/1
	BIB syrup rack, 2W x 4H, 8 pump, LP/HP regulator
	10 line bundle tubing, 100'
	Lancer carbonator
	3M/Cuno water filter kit for beverage & ice
	8 valve installation kit

IBD 4500, 6 valve, 22" with Cubelet Ice Machine	
Part Number	Description
IBD4500-22-6LEV-CUBELET	Ice bev dispenser, 22", 6 LEV self serve lever valves, generic ID
	Hoshizaki adapter plate
	Self-contained 800 lb. CUBELET ice machine, 22" x 27-3/8" x 26", 115V/60/1
	BIB syrup rack, 2W x 3H, 6 pump, LP/HP regulator
	8 line bundle tubing, 100'
	Lancer carbonator
	3M/Cuno water filter kit for beverage & ice
	6 valve installation kit

IBD 4500, 8 valve, 30" with Cubelet Ice Machine	
Part Number	Description
IBD4500-30-8LEV-CUBELET	Ice bev dispenser, 30", 8 LEV self serve lever valves, generic ID
	Hoshizaki adapter plate
	Self-contained 1000 lb. CUBELET ice machine, 22" x 27-3/8" x 26", 208/230V/60/1
	BIB syrup rack, 2W x 4H, 8 pump, LP/HP regulator
	10 line bundle tubing, 100'
	Lancer carbonator
	3M/Cuno water filter kit for beverage & ice
	8 valve installation kit

Dispenser Specs: IBD 4500		
	8 Valve, 22"	8 Valve, 25"
Flexible water	Yes	Yes

Assembled Installation Kits for Bag-In-Box Dispensing Systems

Assembled kits make installation of a 6-20 valve beverage system SO much easier! Simply add a CO₂ tank, connect the tubing between the dispenser and rack assembly, add syrup and you're *ready to serve!*

Welded incline rack assemblies have CO₂ inlet lines, syrup lines, bag-in-box connectors, secondary regulators and syrup pumps mounted on the rack. Tubing is fastened to the rack with cable ties for neat appearance and protection.

The kit includes a fast flow carbonator, primary regulator, and fittings for the carbonator, regulator and beverage dispenser: washers, nut and stem assemblies, barbed crosses, barbed tees, and cable ties. Each kit also includes (1) 25' roll of 3/8" single line BIB tubing for the carbonator, regulator, syrup pumps and water hook up. The only component that must be ordered in addition to this kit is the length of bundled beverage tubing (100, 200 or 500 ft.) for the syrup run from dispensing unit to the BIB boxes.

If your installation is unique, we'll be happy to customize an installation kit for you.

Regulator

Carbonator

Tubing

Fittings

	Assembled Rack Components				Kit Components				Add to Kit
System	Assembled welded incline rack	Flojet syrup pumps	BIB connectors	Secondary regulator	Fast flow carbonator	Primary regulator	25' roll BIB tubing	Fittings	Bundled barrier tubing: 100, 200 or 500' roll
6 Valve	2W x 3H	6	6	1	1	1	1	All	8 line, 3/8" lines
8 Valve	2W x 4H	8	8	1	1	1	1	All	10 line, 3/8" lines
10 Valve	2W x 5H	10	10	1	1	1	1	All	12 line, 3/8" lines
12 Valve	3W x 4H	12	12	1	1	1	1	All	14 line, 3/8" lines
16 Valve	Purchase (2) 8 valve assembled kits								(2) 10 line, 3/8" lines
20 Valve	Purchase (2) 10 assembled valve kits								(2) 12 line, 3/8" lines
24 Valve	Purchase (2) 12 assembled valve kits								(2) 14 line, 3/8" lines

Complete Installation Kits for Bag-In-Box Dispensing Systems

Take the time and guess-work out of ordering everything you'll need to build a new BIB dispensing system. Our packaged kits contain all the installation components you'll need to install a 6-24 valve beverage system. The only component that must be ordered in addition to this kit is the length of bundled beverage tubing (100, 200 or 500 ft.) for the syrup run from dispensing unit to the BIB boxes.

Every kit includes a welded incline rack, syrup pumps, BIB bag connectors, fast flow carbonator, primary regulator, secondary regulator, components for the carbonator, regulator and beverage dispenser cold plate inlet plumbing: washers, nut and stem assemblies, barbed crosses, barbed tees, and cable ties. Each kit also includes (1) 25' roll of 3/8" single line BIB tubing for the carbonator, regulator, syrup pumps and water hook up.

If your installation is unique, we'll be happy to customize an installation kit for you.

System	Included in Each Kit								Add to Kit
	Welded incline rack	Flojet syrup pumps	BIB connectors	Fast flow carbonator	Primary regulator	Secondary regulator	25' roll BIB tubing	Fittings and cable ties	Bundled barrier tubing: 100, 200 or 500' roll
